ABOUT US

IKES Integrated Services is an engineering, construction and industrial services company providing integrated solutions across the oil & gas, marine, infrastructure and industrial sectors.

Our capabilities cover major construction services, technical consultancy, dredging, rehabilitation and upgrade works, fabrication, installation and maintenance, equipment and material supply, haulage, and integrity testing.

We combine technical expertise, experienced personnel, appropriate equipment and a commitment to safety and quality to deliver practical solutions that meet our clients'requirements.

Our approach is built around understanding each client' operational needs and providing dependable services from planning and engineering through installation, maintenance, rehabilitation and project completion.

We recognize that successful projects require more than technical capability. They require professionalism, effective coordination, quality workmanship, safety consciousness and timely delivery.

MISSION & VISION

MISSION

To provide dependable, cost-effective and professionally executed engineering and construction solutions that meet our clients'operational needs while maintaining the highest standards of safety, quality, integrity and environmental responsibility.

Vision

To become a leading and trusted provider of integrated engineering, construction and industrial services, recognized for quality, safety, innovation, reliability and sustainable project delivery.

Our Strategic Objectives

- Deliver Excellence —consistently meet or exceed client expectations.
- Build Trust —develop lasting relationships with clients and partners.
- Promote Safety —make HSE integral to every project.
- Develop Expertise —continuously improve workforce skills and technical competence.
- Deliver Value —provide practical, cost-effective solutions without compromising quality.
- Grow Sustainably —build capacity for increasingly complex projects.

OUR VALUES

INTEGRITY — We conduct our business with honesty, transparency and accountability.

SAFETY — We prioritize the safety and wellbeing of employees, clients, contractors and communities.

QUALITY — We are committed to delivering services that meet applicable standards and client specifications.

PROFESSIONALISM — We maintain high standards of competence, discipline, communication and service delivery.

RELIABILITY — We strive to be a dependable partner that clients can trust.

INNOVATION — We embrace improved technologies, methods and ideas that enhance performance.

TEAMWORK — We believe successful projects are built through collaboration.

CUSTOMER FOCUS — We listen to clients and tailor solutions to their requirements.

OUR SERVICES

01. MAJOR CONSTRUCTION SERVICES

Installation / Upgrade of Onshore & Offshore Production Facilities & Platforms;

- Process Facilities.

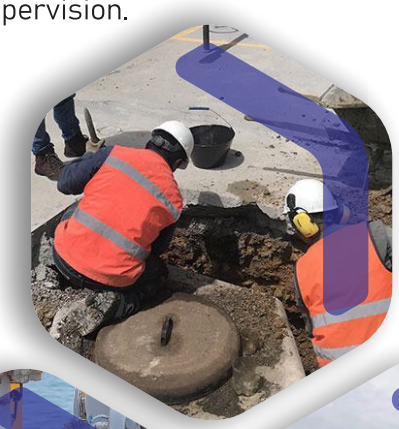

Our construction capabilities support installation, modification, rehabilitation and upgrade activities associated with production facilities and platforms.

02. TECHNICAL CONSULTANCY

Engineering Services supporting project planning, technical studies, installation, maintenance, facility upgrades and construction supervision.

- Project planning
- Engineering assessments
- Technical studies
- Installation planning
- Maintenance planning
- Construction support
- Facility upgrades
- Technical documentation
- Project coordination

03. DREDGING SERVICE

Dredging for marine, industrial, construction and infrastructure projects, including channel work, site preparation and waterway maintenance.

- Channel dredging
- Marine infrastructure support
- Site preparation
- Waterway maintenance
- Sediment removal
- Excavation and reclamation support

04. REHABILITATION / UPGRADE / FABRICATION

Minor Metal Fabrication; Overhead Tanks; Drainage;

- Onshore Scaffolding.
- Supports and brackets
- Frames and platforms
- General metal works
- Tank installation and support structures
- Drainage construction and rehabilitation
- Onshore scaffolding support

05. INSTALLATION & MAINTENANCE

Plumbing Installation / Maintenance & Material, including pipework, water supply systems, repairs and replacements.

- Plumbing installation
- Preventive and corrective maintenance
- Pipework installation
- Repairs and replacements
- Water supply and drainage connections
- Plumbing materials supply

06. EQUIPMENT / MATERIAL SUPPLY

Valves up to 12", Nozzles, Expanders & Flanges; Seals, O-rings, Bolts and Nuts.

- Valves up to 12 inches
- Nozzles
- Expanders
- Flanges
- Seals and O-rings
- Bolts and nuts

07. HAULAGE

Goods / Materials Road Haulage for construction and industrial project logistics.

- Construction materials
- Industrial equipment
- Pipes and fittings
- Fabricated components
- General project materials
- Equipment movement and site deliveries

08. INTEGRITY TEST

Underground Oil & Gas Storage Tanks, supporting inspection, testing, leak detection and condition assessment.

- Tank integrity assessment
- Leak detection support
- Inspection activities
- Testing and verification
- Condition assessment
- Maintenance recommendations

OUR PROJECT APPROACH

01 — UNDERSTAND
We understand the client's requirements, objectives and operational challenges.

02 — PLAN
We establish an execution strategy, resources and schedule.

03 — EXECUTE
Our teams execute work in accordance with approved specifications and procedures.

04 — MONITOR
We monitor quality, safety, progress and resource utilization.

05 — DELIVER
We complete projects with quality documentation, client satisfaction and timely handover.

06 — SUPPORT
Where required, we provide ongoing maintenance, technical and operational support.

IKES INTEGRATED SERVICES

INTEGRATED ENGINEERING, CONSTRUCTION & INDUSTRIAL SERVICES

Whether you require construction support, engineering consultancy, dredging, fabrication, installation, maintenance, equipment supply, haulage or integrity testing, IKES Integrated Services is ready to discuss your requirements.
